

Dear Customer,

The District is the process of upgrading the meter reading technology and will be at your residence sometime in the next few weeks. There are about 400 meters that need to be changed. This project will take approximately 6 weeks to complete. Below is a list of streets the crew will be working on to replace meters. Some of these streets will only have a few meters that will need to be changed.

The first step to this process is a crew member will mark the meters that need to be replaced and clean out the meter box then another team member will upgrade the meter. At that time, the water will have to be shut off in order for the crew to work on the meter. You may experience some air or discolored water in the line. It will clear up quickly by letting the water run for a few minutes. This process should only take about 30 minutes, if water is off for a longer period of time and workers are not present please contact the office at 512-321-1688.

The crew will be working on the weekends as well, weather permitting.
