

BASTROP COUNTY WATER DISTRICT
WATER / WASTEWATER EXPANSION
PROCESS TO EXTEND SERVICES

1. Contact District to determine where existing utilities are located.
2. Obtain copy of the District rules and regulations for extending water and sewer service.
3. Provide drawings completed by surveyor to show property lines, other utilities and roadway dimensions for entire length of area in question.
4. Sit down with District personnel to discuss the needed size of the pipes to be extended.
5. Place proposed water and sewer utilities on drawings and bring to District office for review.
6. Once drawings are approved to proceed, have contractor (must be approved by District) gather for a preconstruction meeting.
7. Provide the District with a list of materials that will be purchased from the parts distributor for review by the District (all materials must conform to District Specifications).
8. When materials are delivered to the site, a shipping list must be provided to the District for approval before work commences.
9. Only the District personnel are to operate valves.
10. The District will inspect the work as it proceeds and will reject any work that is not performed pursuant to the District rules and regulations.
11. Water main extensions will be pressure tested and disinfected pursuant to AWWA and District Standards.
12. All costs of extending service will be the responsibility of the land developer/builder.
13. The District will accept the mains (water and/or sewer) for service once all testing and test results are acceptable.
